Wiesbaden - Venues where you can feel at home

International Conferences

Why RMCC is ideal for international association conferences and congresses

- Two large, divisible congress halls for plenary sessions and parallel formats
- Flexible room concepts for breakout sessions, exhibitions, and networking
- State-of-the-art technical infrastructure for hybrid and digital events
- High security standards suitable for high-profile and sensitive events
- Excellent international connectivity (Frankfurt Airport – 20 minutes)

The venue

The FEDESSA Conference will take place in Halle Nord at the RheinMain CongressCenter (RMCC) in Wiesbaden, a modern and highly flexible venue designed to host large international events.

The trade show will be located in the first section of Halle Nord, offering approximately 2,200 m^2 of exhibition space. Positioned at the heart of the conference, the exhibition will serve as the main networking hub where delegates, operators, and suppliers connect throughout the event.

The conference plenary sessions will take place in Segment C of Halle Nord, allowing seamless movement between the exhibition and the conference programme and ensuring strong footfall across the trade show area.

Registration will be located at the entrance to the exhibition hall, guaranteeing that all delegates pass through the exhibition space and maximising visibility and engagement for sponsors and exhibitors.

Conveniently located within walking distance of Wiesbaden's main train station and just 20 minutes from Frankfurt Airport, the RheinMain CongressCenter offers excellent accessibility for both European and international attendees.

Help Drive the Future of Vehicle Electrification

For 25 years, AABC has organized the preeminent events covering vehicle electrification, where chief battery technologists from leading automotive OEMs, and key members of the supply chain, discuss the latest technology trends in the rapidly expanding market of advanced vehicles and the batteries that will power them.

AABC's Founding Academic Fellow

Professor Martin Winter is the founding director of the Helmholtz Institute "Ionics in Energy Storage" as well as of the MEET Battery Research Center, University of Münster. Martin holds a unique position as passionate teacher to industry and governments on science and technology of batteries and energy storage.

AABC and Cambridge EnerTech Are Proud to Announce the First Group of OEM Fellows

Key automotive OEMs have played a special role in the success of AABC for 20 years, and the OEM Fellowship was created to reaffirm that this unique relationship will continue in the future. Additional OEM Fellows will be announced in the near future.
